PARENTS' ACTIVE ROLE IN SCHOOL

Another important concern of mine regarding our students is that our children are missing the personal touch of their parents. I am deeply saddened when parents do not sign the notices sent by the teachers.

February

2023

I request you parents to check the calendar of your child and the school app daily. It's important to remain connected with the school of your child and take an active part in the life of your child.

Take time to ask your son & daughter about the day spent in school, his or her behaviour in class, lessons taught by the teachers, homework and overall conduct in school.

FOUL LANGUAGE

Everyday children are brought in my office for using foul language. I am surprised to hear the language and the abusive words used by the children. It's highly essential that you keep a check on the language of the child, his or her peer group and the neighbourhood.

Children are easily influenced by the language and behaviour of the elders around them. So, please do not argue, fight, shout in the presence of your child. The child reflects the tension of the family in the class through aggression, hyper-activity, abusive words, fear, restlessness and fights.

Let's together create a safe environment for the child at home and contribute for his holistic development.
